## Choosing weight plates for your home gym.

The Steelflex Olympic plates are coated with high-density rubber, featuring:

**Shock resistance**

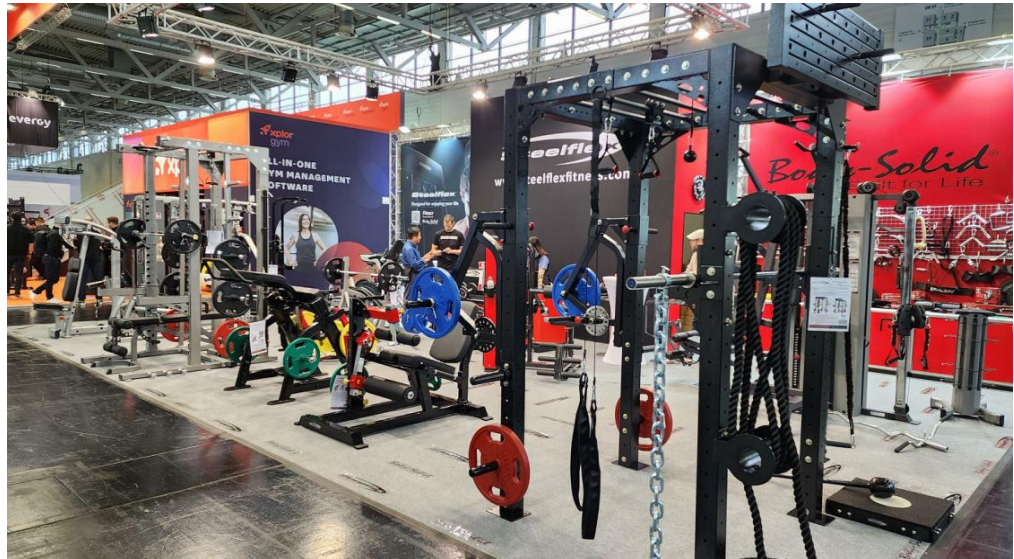

**Impact resistance**

**Low rebound**

**High-strength fatigue durability**

To meet the standards for competition-grade plates, these characteristics have undergone over 20,000 drop tests in our production process, resulting in high-quality, highly durable weightlifting competition plates.

Explore our versatile range of Olympic plates, available in 7 different weights: **1.25, 2.5, 5, 10, 15, 20, and 25 kgs.** We proudly offer these with **no minimum order quantity**, inviting you to mix and match with Steelflex and Body-Solid products for the best fitness setup. Take advantage of our progressive **discounts—the more you buy, the more you save.** **Discounts apply even if you purchase just a single plate!**
