NEO

Steelflex

Features

The machine of series Neo provides versatile workouts, so it is the optimal selection for a health fitness club.

The frame finishes with a two-coat and two-bake painting process for aesthetics and high quality.

The stable and durable bearing furthers the quality guarantee of machines.

The comfortable, durable padding upholstery and backrest reduce the compression on the outer muscle.

NOFB

Olympic Flat Bench

Olympic flat bench NOFB features a thoughtful design that adapts to various requirements of any facility while helping to build the triceps, deltoids, and pectorals. Heavy-gauge oval tubing mainframes with the spotter platform ensure maximum safety during intense lifts. The low profile of the quality bench minimizes the back arch.

SPEC

NOIB

Olympic Incline Bench

The NOIB enables operators to work the incline chest press that develops a brawny chest and upper arm. The pop-pin adjustable seat accommodates exercisers of varying sizes. Dual bar catches provide different storage positions.

SPEC

NODB

Olympic Decline Bench

Olympic decline bench NODB is constructed with heavy-gauge oval tubing to enhance stability and durability. The large backrest supports the upper body to keep alignment. Angled knee pads with foot rollers assist the decline press movement in a correct position while reducing the shoulder rotation.

SPEC

NOMB

Olympic Military Bench

Steelflex Olympic military bench NOMB assist in developing the muscle mass of the deltoid and triceps. The premium sweat-resistance seat and back pad are easy to clean and eliminate stresses during the press movement. The quality mainframe and integrated spotter platform improve the stability of the machine.

SPEC

▲ **NOSS-1&NOFB**

▲ **NOSS-2&NOIB**

NOSS-1/ NOSS-2 Spotter Stand

Both the NOSS-1 and the NOSS-2 comprise a pair of height-adjustable spotter stands with a wide safety catch design. When paired with the NOFB Olympic flat bench, they ensure the safety of exercisers during pressing workouts, providing protection against failed lifts.

SPEC

▲ **NOSS-1&NODB**

NOPR

Olympic Power Rack

The NOPR is built of heavy-gauge steel tubing with a double powder coating that promotes the safety and service life of the machine. And there are many optional attachments, including Steelflex FSR1-3, FWH1, and FRS1, which allow customization to fit various workout demands.

SPEC

NBSR

Stretch Rack

The NBSR stretch rack is constructed with robust design, ensuring both safe operation and durability. Utilizing only this innovative equipment can establish a dedicated fitness area designed specifically for flexibility or stretch training within your facility. Without worrying about space limitations, whether you want to warm up before exercise or perform post-exercise stretches, the NBSR can meet all your needs.

SPEC

SPEC

NTR

Weight Tree Rack

The tree rack NTR features side-by-side horns to suspend various weight plates safely off the floor. Steel holders organize the barbell bar to create the maximum storage capacity.

SPEC

NTR2

Functional Tree Rack

The NTR2 features wheels for shifting conveniently and is ideal for indoor and outdoor utilization. Fitness package renegade system and accessories FWH1/FRS1 can equip at the sides of the NTR2 to promote functional workout effects.

NBR

Barbell Rack

Constructed with heavy-gauge oval tubing improves the solidity, safety, and durability of the NBR. Bilateral bar catches provide quick and easy-access storage for up to 10 fixed-weight barbells. Molded urethane protects the frame against scratches.

SPEC

NAB

Abdominal Bench

Bench NAB is efficient in isolating the entire abdominal region with crunch motion. The ergonomic design of the back and head pads provide maximum comfort and keep proper body alignment. The angled handle assists operators in performing workout routines while reducing neck strain. The weight horn accommodates various plates of any exercise level.

SPEC

NAAB

Adjustable Abdominal Bench

Adjustable abdominal bench NAAB is constructed with heavy-gauge oval tubing to improve safety and stability that allows working oblique crunches, decline presses, and leg raises. The pop-pin adjustable design of rollers and the back pad make it ideal for various workout routines. The handle with transport wheels assists in mobility.

SPEC

NAC

Abdominal Crunch

The upright position design of the NAC makes it easy to enter and exit. High-quality upholstered pads contribute comfort during intense exercise to help the user keep a long-term workout. Dual ergonomically designed handles provide a natural motion. The adjustable seat increases workout variations for abdominal muscle development. The upward and downward detachable adjustment installs on the back of the machine allows for working out the abdomen conveniently.

SPEC

VIDEO

NBE

Back Extension

Featuring a pop-pin adjustable design for different height requirements, the NBE accommodates various size users. The delicate thigh pad with an oversize foot platform offers comfort and support to hold body alignment. A unique curve handle helps to maintain balance.

SPEC

NRCH

Roman Chair

Working on your fitness goals for carving out six-pack-abs to develop the strength, flexibility of the back spine, and glute, roman chair NRCH is felicitous equipment for the above requirements. Thick, sweat-resistant thigh pads avoid slipping danger. And the blister design foot platform with durable roller supplies maximum support to ensure stability and safety during exercise.

SPEC

NGHB

Gluteus Ham Bench

Bench NGHB is considered the ideal equipment for building the hamstring, lower back, and gluteus. The thoughtful design of handles makes the entry and dismount more convenient. Thick arc pads and adjustable vertical rollers accommodate various user heights while maximizing safety.

SPEC

NPCB

Preacher Curl Bench

The oversize, flat elbow pad provides ideal support for joints that optimizes the stability during bicep curls. Bilateral plastic bar catches promote the storage durability of the NPCB.

SPEC

NVKR

Vertical Knee Raise

The structural integrity of the NVKR delivers via heavy-gauge steel mainframe construction. Features pull-up and dip station with PVC grips to perform knee raises, leg raises, and single-leg lifts to create a fit look for the arm, shoulder, and abdomens. Thick, quality back and elbow pads reduce fatigue that helps the operator in a correct position. Two step-up platforms make entry and exit conveniently.

SPEC

VIDEO

NSS

Sissy Squat

Machine NSS is an ideal equipment to perform sissy squats. Bodyweight exercises can develop the core, thigh, and abdomen that enhance balance and flexibility. The non-slip, blister design foot platform with the roller assists the operator in keeping stability during intense workouts. Constructed with heavy-gauge steel frames promote stabilization of the NSS.

SPEC

NBS

Stretch Chair

The safety wrist strap design of the NBS ensures safety during the stretching to protect operators from falling off the chair. The handlebar allows multiple grip positions to meet different workout requirements. An angled back pad with stable rollers locks the user into place to establish muscular strength and endurance.

SPEC

VIDEO

NDB

Adjustable Decline Bench

The hydraulic adjuster comes with a pop-pin design for operating conveniently. Thick, high-quality knee pads and ankle rolls provide support during exercise. Dual wheels and the ergonomic front handle help to shift bench NDB instantly.

SPEC

NIB

Adjustable Incline Bench

The angled and pop-pin adjustable backrest allows various positions for strength workouts. The flat, space-saving steel feet with a curve mainframe provide support and stability. Sealed bearing at all pivot points safeguards the exerciser.

SPEC

NFB

Flat Bench

A heavy-duty steel base ensures durability and security. The NFB features a lightweight but strong structure. And the solid upholstery is made of high-density foam, which reduces muscle fatigue and enhances comfort during exercise.

SPEC

NST

Utility Stool

The delicate design of stool NST adapts to various requirements of different facilities. The NST is ideal for performing basic dumbbell and barbell exercises, including the alternating curl, shoulder press, or triceps extension. High-grade steel construction optimizes maximum stability.

SPEC

NFID

Multi Bench

An innovative ladder-style adjustment with support bars helps set the back pad into a proper position. The sturdy base frame is built of heavy-gauge oval tubing to ensure stabilization of bench NFID.

SPEC

NMDR 2

Mechanics Dumbbell Rack

SPEC

Keeping the workout area organized and safe, Steelflex mechanics dumbbell rack NMDR2 is accessible storage up to 20 dumbbells. The groove design of the rack tray for convenient use also locks the dumbbell into place. The storage tray can withstand loads from heavy to light-weight and reduces the possible injuries to the lower back.

NDR 2

2-Tier Dumbbell Rack

SPEC

The mainframe is built of heavy-gauge oval tubing and welded at all joints enhancing safety and durability for the NDR2. And quality rubber foot pads support the rack to stay stable while defend the unexpected movement. Individual cradles offer the dumbbell with better storage.

NDR 3

3-Tier Dumbbell Rack

SPEC

The three-tier, space-efficient design for rack NDR3 accommodates dumbbells from 2.5 kg to 25kg. Small brackets on every one of the shelves allow convenient take up and put down, also help to recognize the required weight immediately.

NKTR 1

Kettle Bell Rack 1

Ideal for the storage need of facilities, the new NKTR1 is hard to beat. Rack NKTR1 features a trolley design for easy transport even during heavy loads.

SPEC

NKTR 2

Kettle Bell Rack 2

The superior capacity of NKTR2 provides a tidy and clean workout area in any facility. Alternative shelf options of the NKTR2 accommodate either kettlebells or dumbbells.

SPEC

NKTR 3A

Dumbbell Rack

A sleek, solid frame with rubber feet ensures the rack holds a firm position to improve safety. The NKTR3A features three kinds of shelves on each tier to house workout accessories, including kettlebells, dumbbells, and medicine balls.

SPEC

NKTR 3B

Dumbbell Rack

Rack NKTR3B is built of heavy-gauge steel tubing for structural integrity to withstand various free weight training accessories. A rectangle-groove design of the shelf makes tidiness for collocating kettlebells and dumbbells.

SPEC

NGFR 1

Group Functional Rack

The design of rack NGFR1 inspires a better development idea of functional training system 360 that provides versatile exercises in a combined machine. The NGFR1 offers a side-by-side configuration which makes a fitness accessory wall to store multiple workout equipment.

SPEC

NGFR 2

Group Functional Rack

Functional racks are a perfect solution for creating a tidy workout area and maximizing space capacity. The NGFR2 provides storage for various training accessories, including weight plates, medicine balls, and exercise bands. The versatile rack helps facilities to maintain well organized. Rack NGFR2 does not allow for utilizing with functional training system 360.

SPEC

NPF1

Platform

Platform NPF1 is the best equipment for deadlift training. Side stability sticks allow configuring resistance bands that reinforce workout efficiencies. And the weight plate horn design enhances the structural integrity.

SPEC

NPF2

Platform

The medium platform NPF2 provides an appropriate workout area for barbell workouts.

SPEC

VIDEO

NPF3

Platform

A large-scale design of platform NPF3 increases safety and stability during snatch and deadlift training.
