

Steelflex

Steelflex Dual-Function Machine **PL2600**: Triceps Extensions & Biceps Curls in One!

Looking to streamline your workout routine? The Steelflex Dual-Function Machine is the perfect solution for those who want to target both their biceps and triceps without the hassle of switching between different equipment.

Floor space

This innovative machine combines two essential exercises—**triceps extensions** and **biceps curls**—into one seamless, efficient workout experience. Designed for convenience and versatility, it allows you to switch from one exercise to the next with minimal adjustments, saving you time and maximizing your training efficiency.

User-friendly

Find out more

Whether you're training for strength, endurance, or aesthetics, the Steelflex machine ensures a smooth, comfortable motion for both exercises, helping you focus on form and results. It's perfect for both home gyms and commercial fitness centers, making it a must-have for anyone serious about arm training.

Elevate your arm workout today with **the Steelflex Dual-Function PL2600**
your all-in-one solution for stronger, more defined arms!
